

Alfa Laval GLH100

Gas to liquid plate heat exchanger

GLH100 is a high-efficiency compact brazed stainless steel heat exchanger designed to handle asymmetrical flows with exceptionally high performance.

GLH100's patented plate design enables it to handle extremely high gas temperatures without thermal fatigue with sufficient cooling liquid. This makes GLH100 superior as a high-temperature exhaust gas heat exchanger, as well as in all types of condensation applications.

GLH100 can handle gas pressure up to 16 bar(g) at room temperature conditions making it superior for compressor applications. The product's compact size, versatility and excellent heat transfer makes it a perfect choice for a wide range of asymmetrical heat transfer applications. GLH100 in single configuration is suitable for max. 7000 kg/h gas.

GLH100 is certified as pressure vessel on the gas side B.

Technical Data

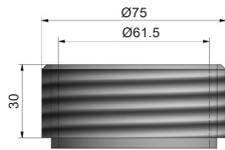

Side (A) "High density":	Water / Liquid / High pressure gas
Side (B) "Low density":	Gas / Steam
Plate material:	ASTM 316L / DIN 1.4404 / SS2348
Connections / Cover plates:	ASTM 304 / DIN 1.4301 / SS2333
Brazing material:	Copper (Cu)
Min. / Max. temperatures*:	-160°C / +190°C
Max. design pressure at	
-160/25/190°C:	Side A: 0/17(15.8) bar(a); 0/247(229) psi(a)
	Side B: 0/17(13) bar(a); 0/247(188) psi(a)
Primary heat transfer surface/plate:	≈ 19 dm ²
Manufacturing standard:	EN13445-3
PED Side A:	In conformance with 2014/68/EU
	Fluid Group: 1 & 2

* Max. design temperature refers to the temperature of the plate material. Gas inlet temperatures can exceed the max. design temperature; the actual acceptable gas inlet temperature will vary from case to case.
