

Alfa Laval GLH150

Gas to liquid plate heat exchanger

GLH150 is a high-efficiency compact brazed stainless steel heat exchanger designed to handle asymmetrical flows with exceptionally high performance.

GLH150's patented plate design enables it to handle high gas temperatures, as well as in all types of condensation applications.

GLH150 can handle the high pressures such as in compressors and intercoolers. The product's compact size, versatility and excellent heat transfer makes it a perfect choice for a wide range of asymmetrical heat transfer applications. GLH150 in single configuration is suitable for max. 8000 kg/h gas.

GLH150 is certified as pressure vessel on the gas side B.
